How many legs? - Maths

For this activity we will be practising our counting skills and number recognition. You can either use the pictures and number cards below or simply make your own if you don't have access to a printer. Show your child the pictures of the animals and ask them if they can find an animal with 4 legs. Repeat this with other animals and encourage your child to count the legs using one to one correspondence.

Lay all the pictures on the floor along with the number cards. Can your child match the numbers to the correct picture to show the number of legs each animal has got?
