

Knowledge & Understanding

Pirates love coins! Before you start this activity you will need to freeze some coins in pots (i.e. yoghurt pots) with water. Once they have frozen, take the pots out of the freezer and show your child. What can you see inside the ice? How will we get it out? Discuss with your child how they can make the ice melt quicker i.e. using hands, hair dryer, leaving in the sun and try out some of these ideas. Which one made the ice melt the quickest? Once all the coins are free, encourage your child to count how many there are.
