

Ordering snakes - Maths

The story Giraffes Can't Dance is set in the jungle. In the jungle there are lots of snakes which are all different lengths. Can you make some snakes at home using wither paper, wool or playdough? Ask your child to order them according to their size. Start with the shortest and work up to the longest. While doing so, use the words long, short, longer, shorter, longest and shortest.

To extend this learning, once you have finished ask your child to make their own snake which is longer or shorter than one you have made.
