

Symmetry

Today we are going to be focusing on symmetry. Use the PowerPoint below to find out about this concept with your child. Can they find anything in your home that is symmetrical? Remember for it to be symmetrical, each half has to be identical.

Can your child make a simple symmetrical picture? The best way of doing this is to paint half a butterfly then fold the paper over. When you open it up, you will have a symmetrical pattern. You could also use Lego to create a symmetrical pattern. See the images below.
