

Being more eco-friendly - Knowledge & Understanding

We've been learning a lot about looking after our Earth this week by recycling, saving energy and finding out how long items take to decompose. I want you to chat with a grown up in the house and think of some ways that all of you can be more eco-friendly at home. Make a list of all the things you could do to help our planet. These could include:

- *Taking a shower instead of a bath to save water
- * Walking instead of taking the car
- * Use less plastic
- *Turn lights and other electrical equipment off when you are not using it
- * Use a compost bin in your garden for your fruit and veg waste.

Try as hard as you can to try and implement some of these changes. If everyone does a little, it will have a big impact on our Earth.
